Welcome Upland Game Bird Hunters!

Welcome to the Montana Fish, Wildlife & Parks Upland Game Bird Enhancement Program (UGBEP).

The purpose of this program is to enhance upland game bird habitats on lands open to free public hunting. FWP partners with private landowners and other individuals, groups, and organizations to improve habitat on private and public lands. With nearly 400 active contracts, Montana landowners and conservation organizations are conserving and enhancing almost 300,000 acres of upland game bird habitat while providing nearly 600,000 acres for public upland game bird hunting.

New for 2016

FWP is pleased to announce a new type of project: Habitat Management Leases! Habitat Management Leases are intended for high quality upland game bird habitat that also provide good hunting opportunities. Management leases focus on smaller, high value sites including riparian areas, old farmsteads, established shelterbelts, a mix of idle cover, or other productive habitats.

Open Fields (OF) for Game Bird Hunters continues to expand enrollment in 2016. Open Fields supports retention of CRP on private lands open to walk-in game bird hunting in the fall only. No further permission is required from the landowner. Thanks to nearly 200 landowners, nearly 75,000 acres of private lands have been enrolled in Open Fields since 2012. FWP anticipates additional enrollment opportunities in the near future.

UGBEP Projects Access Guide maps are available as geospatial PDF maps. When downloaded on devices such as "smart" phones or tablets, these PDF maps allow visitors to dynamically visualize their position in the field relative to important features on the map, such as roads, towns, and project boundaries. Once downloaded to the device, no Internet or cellular connection is required. For more information and to download the georeferenced maps, visit the UGBEP Web page at <http://fwp.mt.gov/ugbep>.

2016 Notice to Hunters

Be aware that some parcels of land enrolled in Open Fields may be newly-seeded stands of CRP or may have recently undergone maintenance provisions that include haying or grazing activities. In some instances, habitat on some parcels may not meet hunter expectations. Please keep in mind that these lands are enrolled in long-term contracts for up to 10 years, so subsequent years can be expected to provide improved habitat.

New habitat projects are contracted year-round. Check the program's access guide web page at <http://fwp.mt.gov/ugbep> for electronic updates to this year's guide.

Please be aware of signed safety areas. Some projects contain No Shooting Areas or Safety Zones around shelterbelts near occupied buildings. Some of these signs may be hidden from your view.

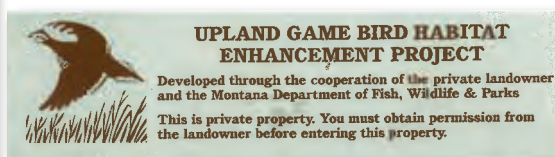

How to Use this Guide

Obtaining landowners' permission to hunt upland game birds is required prior to hunting or entering any private land project area. Exception: Some projects allow walk-in game bird hunting only with no further permission needed.

UGBEP Project Maps found in this publication are intended only as a guide. It is every hunter's responsibility to know the land ownership of the area he or she intends to hunt and any land use restrictions that may apply there. Non-FWP information layers are from other agencies and may not be current, comprehensive, or accurate.

The UGBEP Projects Access Guide contains 2 key sections: (1) Regional Information Tables and (2) Maps. Together, these sections will help hunters locate project areas and the method used to obtain permission to hunt, when applicable. Every project found on the maps is labeled with a project number and is symbolized to indicate the type of permission needed prior to accessing the project area. A

WATCH FOR THESE SIGNS

description of the symbols follow:

Private Lands Symbols

 Black polygon with hatch marks: Landowner permission needed. Hunters can refer to the tables for the method to contact landowner.

 Brown polygon with hatch marks: Walk-in game bird hunting, no further permission needed from the landowner.

 Green circle: Project is located on land enrolled in Block Management. Refer to tables for Block Management Area information.

Public Lands Symbols

▼ Brown triangle: Accessible public land, no permission is needed.

▲ Orange triangle: Accessible public land, hunters need to contact agency for reservations.

The Map Index, located on the inside cover page, provides hunters with a statewide overview of project locations relative to Montana's counties. Grids containing UGBEP projects are labeled with the Map Page number. This number corresponds to the map page found in the Guide. Map Pages also contain greater detail about the project areas, including nearby roads, private land boundaries, projects located on public lands, or projects located on Block Management Areas. All projects are symbolized according to the type of permission needed and labeled with a project number(s) that corresponds to a tabular description in the Regional Information Tables.

Project numbers are located in the Regional Information Tables according to FWP's Wildlife Administrative Region. To locate the project number in the tables, use the Map Index to first determine in which Region the project is located, then refer to the Regional Information Tables that contain detailed project information, including the method to obtain permission to hunt, cooperator name, project termination date, project/enhancement types, access acreage, and associated Map Page. Hunters can also refer to the tables first to select a project they are interested in, then refer to the Map Page number to locate the project on the map.

Helpful Tips

FWP wants to ensure landowners, hunters (and their dogs) have rewarding experiences through the UGBEP. The following tips are intended to provide hunters with some additional considerations.

Respect private lands. Possession of the maps found in the Guide does not constitute legal access to the

private land enrolled in the UGBEP. Hunters must always obtain landowner's permission unless noted otherwise in the Guide.

Firearms may not be discharged within ¼ mile of an inhabited dwelling or outbuilding without permission of the inhabitant.

Upland Game Bird Enhancement Program Projects

The UGBEP provides financial assistance to cooperators interested in enhancing habitat for upland game birds. Below are descriptions of the more common types of projects. Pheasant releases are only conducted in areas with suitable habitat.

Aspen Regeneration

To improve long-term habitat productivity for ruffed grouse, old and dying aspen stands are rejuvenated through logging practices.

Grazing Management System

A rest-rotation grazing system provides undisturbed hiding cover on approximately 1/3 of the grazing system area each year. These projects are mostly geared toward sharp-tailed grouse, sage-grouse, and gray partridge but may also benefit pheasants.

Nesting Cover

Nesting cover projects are associated with the Conservation Reserve Program, in which UGBEP cost-shares or provides other incentives to the landowners to promote the use of beneficial grass mixes.

Pheasant Release

The goal of the pheasant release program is to establish or enhance pheasant populations. Pen-reared pheasants are released in habitats that can support pheasant populations.

Upland Game Bird Enhancement Program Projects

Open Fields for Game Bird Hunters

Open Fields provides additional incentives to landowners to maintain CRP on their land. CRP provides important cover for Montana's game birds and other wildlife.

Sagebrush Lease

FWP has over 30-year lease agreements with landowners to conserve prime sage-grouse habitat. Through the lease, landowners agree not to spray, burn, plow, or otherwise convert sagebrush-grassland habitats. These areas mostly support greater sage-grouse.

Shelterbelt

Shelterbelts are shrub and tree plantings designed to provide winter cover for pheasant, sharp-tailed grouse, and gray partridge.

Winter Food or Cover Plot

Domestic grain plantings serve as a winter food source for pheasant and gray partridge, but sharp-tailed grouse may also benefit from these plots.

Swatter Load For Wounded Birds	20-30	Steel 7 to 6	1	1	175	Improved Modified, Full	

This table summarizes Tom Roster's analyses to date of the lethality data bases for certain of the 16 U.S. steel vs lead waterfowl & dove shooting tests published between 1968 & 2014 & one steel-only pheasant shooting test (1999) plus lethality data bases owned by ammunition companies for birds taken with nontoxic shotshell loads Roster tested for them & the CONSEP Org.

Note: Steel #BBB (.190") & HEVI-Shot #2 (.150") have exhibited the best all-around performance for taking geese; steel #3 (.140") & HEVI-Shot #4 (.130") the best all-around performance for taking ducks; steel #2 & HEVI-Shot #4 (.130") the best all-around performance for taking ring-necked pheasants; & steel 7's (.100") the best all-around performance for taking doves.

¹These findings are derived from testing 2 3/4" 28 gauge; 3" 20 ga.; 2 3/4", 3" & 3 1/2" 12 ga.; & 3 1/2" 10 ga. steel loads; plus 2 3/4" 28 ga.; 2 3/4" & 3" 20 ga.; and 2 3/4" & 3" 12 ga. HEVI-Shot loads.

Hunter Landowner ★ STEWARDSHIP PROJECT ★

The Hunter-Landowner Stewardship Project is a program designed to promote responsible hunter behavior and help hunters and landowners build effective relationships based upon mutual respect and understanding.

The program is intended to reach an audience of hunters and landowners. People who complete the program can receive a certificate, bumper sticker, and free cap.

The voluntary information and education program is available at no cost.

A golden retriever puppy is lying on a dark, patterned carpet next to a large, taxidermied bull head. The puppy is looking towards the camera and has a small white object in its mouth. The bull head is positioned behind the puppy, and its large, curved horns are visible. The background shows a room with a wooden floor and a white cabinet.

2016 Sunrise-Sunset Tables For Determining Hunting Hours

These tables, including adjustments for daylight savings time, are the official sunrise-sunset tables adopted by the Montana Fish, Wildlife & Parks Commission for hunting in Montana. Authorized hunting hours for the taking of upland game birds and falconry begin one-half hour before sunrise and end one-half hour after sunset each day of the hunting season. **(Do not use other sources.)**
